

TSS

Inslagplug met verzonken kraag

De inslagplug met verzonken kraag TSS is geschikt voor het snel bevestigen van lichte elementen op diverse ondergronden. De nylonplug beperkt warmteoverdracht en de voorgemonteerde nagel zet de plug uit wanneer erop wordt geklopt.

Kenmerken

Materiaal

- Plug : grijs nylon,
- Schroeven : elektrolytisch verzinkt staal.

Voordelen

- Zeer eenvoudige montage en demontage dankzij de nagel met schroefdraad,
- Uitzetting door schroeven of hameren,
- Perfect contact met het materiaal, gelijk met het oppervlak,
- Zigzaggleuf om scheefstand van de nagel te voorkomen.

Toepassingen

Toepassingsgebieden

- Bevestiging van kepers of steunlatten,
- Bevestiging van enkele hoekijzers en ramen en deuren,
- Bevestiging van rails en klemmen voor kabels en leidingen,
- Bevestiging van dunne bekledingen op buiten- en binnengevels.

Ondergrond

- Ongescheurd beton,
- Hol en vol metselwerk,
- Cellenbeton.

1. The design loads have been calculated using the partial safety factors for resistances stated in ETA-approval(s). The loading figures are valid for unreinforced concrete and reinforced concrete with a rebar spacing $s \geq 15$ cm (any diameter) or with a rebar spacing $s \geq 10$ cm, if the rebar diameter is 10mm or smaller.

2. The figures for shear are based on a single anchor without influence of concrete edges. For anchorages close to edges ($c \leq \max [10 \text{ hef}; 60d]$) the concrete edge failure shall be checked per ETAG 001, Annex C, design method A.

3. Concrete is considered non-cracked when the tensile stress within the concrete is $\sigma_L + \sigma_R \leq 0$. In the absence of detailed verification $\sigma_R = 3 \text{ N/mm}^2$ can be assumed (σ_L equals the tensile stress within the concrete induced by external loads, anchors loads included).

*Not covered by ETA-11/0080
