SIMPSON

Strong-Tie

T-PB

T Strap Tie Design Series

T shaped strap for connecting beams to posts in garden applications such as pergolas and other light constructions.

Features

Material

- Galvanized steel S250GD + ZM310
- Painted black RAL9005

Benefits

- Increases the strength of beam-to-column connections,
- Make pergolas, awnings and other lightweight structures more reliable where the end of a beam is supported by a post,
- Simple to install using SSH black head screws.

Applications

Support

- **Header Member:** Solid timber, composite timber, glulam
- **Joist:** Solid timber, composite timber, glulam

For use with

- Joists
