

TMC

Metallic Anchor for Plasterboard

The TMC metallic anchor in the versions Ø8, Ø10 and Ø12 mm is designed for fixings on anchoring bases with cavities. The anchor is placed in push-through assembly with the TMC setting tool, tightened and braced against the building material. By means of the pre-mounted metric screws, attachments can then be connected and also removed again in a force-locking manner.

Features

Material

- Steel
- White zinc plated

Benefits

- Wide washer to cover possible hole imperfections
- The setting tool prevents over stressing the base material during installation.

Applications

Applications

- Electrical components
- Radiator brackets
- Pipe clips

Suitable for

- Cell like clay brick (partially suitable)
- Hollow dense aggregate block (partially suitable)
- Hollow light aggregate block (partially suitable)
- Plasterboard
- Panels and sheets
