

NP 1200

Hulplade strimler

The size of a nailplate is specified by $t \times A \times B$ (see illustration).

Note: The orientation of the nailpattern is specified by $A \times B$. Nailplates outside of standard range can be manufactured as rectangles, parallelograms etc. Likewise the standards, the orientation of the nailpattern is specified by $A \times B$.

Features

Material

Kvalita oceli:**S 250 GD+Z 275 dle norem DIN EN****Ochrana proti korozi:****275 g/m pozinkováno z obou stran cca 20mm****U-Scheibe:****Kvalita oceli:****S 235 JR dle norem DIN EN 10025****Ochrana proti korozi:****Tloušťka vrstvy pozinkování asi 55 mikronů v souladu s DIN EN 1461**

Výhody

- Nailplates can be manufactured in sizes and shapes acc. to customer needs and requirements
- Can be used where standard nailplates are not available

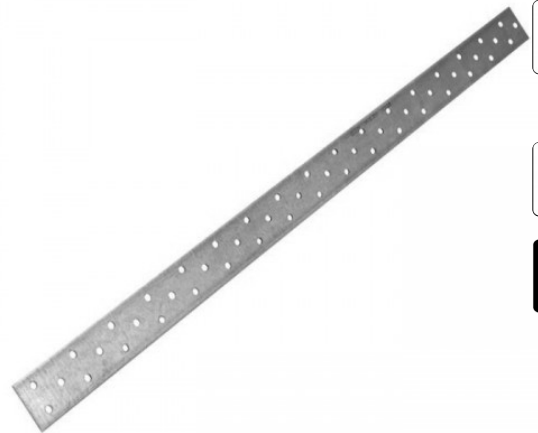

Applications

Použitelné materiály

Dřevo, dřevěné materiály.

Oblast použití

- NP nailplates are used as strap plates in wooden constructions of any kind
- NP are used in particular for preparation of trusses and collar beam trusses. TRÆ 28 provides detailed instructions about this subject
- Always use 2 nailplates per assembly
