

QDPRORFE

### Quik Drive Roofing Tile System

The QDPRORFE is a Quik Drive attachment suitable for screws ranging from 38 mm to 64 mm in length. It can be used for a variety of applications including fixing cladding boards, roof tiles, decking and flooring. The visibility window in the nose piece allows for visual inspection and precise placement of screws and improved accuracy. Quik Drive attachments are manufactured containing PTFE to reduce friction and impart non-stick properties meaning that no lubrication is required. The QDPRORFE is available as attachment only and extension poles can be purchased separately.

CE

## Features
