

GF Drywall Anchor

Drywall anchors are used for indoor fixing in plasterboard and pre-assembled walls made from plaster bonded to polyurethane. The drywall anchor, which has a drill point, is self-drilling. This means that the fixing can be screwed direct to the wall without a pre-drilled hole.

Ominaisuudet

Features:

- Electro galvanized
- No pre-drilled holes
- Screw included

Sovellus

Application:

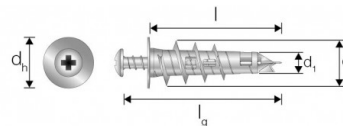

- Drywall
