

XL

Wallgrabb Maxi Board fixing

Use indoors for fixing to double plasterboard or lightweight concrete without the need for pre-drilling. The board fixing XL is knocked in with a hammer. Then a Ø3.5-4.5 mm wood or wafer head screw is used. As the board fixing is 30 mm long, use a screw measuring at least 30 mm plus the thickness of the plasterboard or fibreboard.

Ominaisuudet

Features:

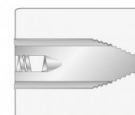

- Hidden assembly
- Easy installation
- No drilling required

Sovellus

Application:

- Sandbrick / Leca / Lightweight concrete
