Technical data sheet

AT-HP
High Performance Resin

AT-HP is a styrene free methacrylate resin suitable for high performance fixing applications in threaded rod into concrete.

- *Easy to dispense and fast curing, it's specially designed for structural fixings and construction uses.*
- *ETA Option 8 for threaded rod and rebar*

Features

Material

- Styrene free methacrylate resin.
- Threaded rod: galvanised steel and stainless steel A4-70.

Benefits

- Fast curing.
- Low odour.
- Non-flammable.
- Easy to dispense.

Applications

Header member

- Non-cracked concrete.
- Solid blocks.
- Hollow blocks.
- AAC Blocks.

Hollow block.

Post to concrete.

For Use With

- Threaded rod and rebar connections.
- Racking.
- Balconies.
- Facades.

Concrete :
1. The design loads have been calculated using the partial safety factors for resistances stated in ETA-approval(s). The loading figures are valid for unreinforced concrete and reinforced concrete with a rebar spacing s ≥ 15 cm (any diameter) or with a rebar spacing s ≥ 10 cm, if the rebar diameter is 10mm or smaller.
2. The figures for shear are based on a single anchor without influence of concrete edges. For anchorages close to edges (c ≤ max [10 hef; 60d]) the concrete edge failure shall be checked per ETAG 001, Annex C, design method A.
3. Concrete is considered non-cracked when the tensile stress within the concrete is\sigmaL +\sigmaR ≤ 0. In the absence of detailed verification\sigmaR = 3 N/mm² can be assumed (\sigmaL equals the tensile stress within the concrete induced by external loads, anchors loads included).

- **Manual Air Cleaning (MAC) for all drill hole diameters $d_0 \le$ 24 mm and drill holl depth $h_0 \le$ 10d :**
  - **4x blowing (hand pump)**
  - **4x brushing**
  - **4x blowing (Hand pump)**
- **Compressed Air Cleaning (CAC) for all drill hole diameters d_0 and drill hole depths :**
  - **2x blowing (min. 6 bar - oil free compressed air)**
  - **2x brushing**
  - **2x blowing (min. 6 bar - oil free compressed air)**
- **Cartridge temperature (Bond material) : ≥ +20°C**

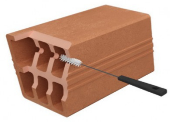
Drilling methods

Solid brick/concrete	Percussion/hammer drilling
Hollow/perforated brick	Rotation drilling
Aerated concrete	Percussion/hammer drilling

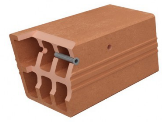
Technical data sheet

AT-HP
High Performance Resin

Drill.

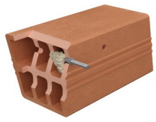


Brush.

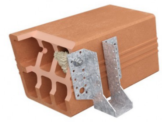


Insert sieve.

Inject the resin.



Insert the rod, turning slowly.



Once set, full load capacity is reached.

Drill.

Remove dust by brushing and blowing,

Fill the hole to half or two thirds, Withdrawing the nozzles with each pump.

Insert the rod, turning slowly.

Once set, full load capacity is reached.
