

RST Hard Drywall to Steel Screw

Drywall screw Combi for hard plasterboard is used indoors for fixing hard plasterboard to steel joists with a maximum thickness of 1 mm. The screw's design with counter-threads removes enough plaster for the head to become properly countersunk in the board.

Features

Material

.

Features

- Cross point head.
- Reduced bugle head.
- Sharp point.
- Twin thread with reverse thread.
- Phosphated coating.

Applications

Suitable For

- Hard drywall/plasterboard to steel.

When to use

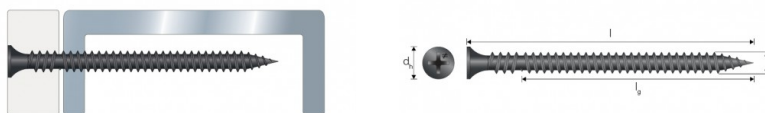

.
