### Wafer Head Plasterboard Screw

*The wafer head screw for plasterboard is used for fixing lighter fittings such as picture hooks and towel rails directly into plaster, without a batten base. When fixing use a screwdriver, not a power screwdriver, due to the risk of over torque.*

## Features

### Material

.

### Features

- Cross point drive.
- Wafer head.
- Sharp point.
- Coarse thread.
- Electro galvanised coating.

## Applications

### Suitable for

- Light fittings to plasterboard.
- Towel rails to plasterboard.
