Framing Nail 34° Wire Weld - Clipped Head, Grooved - HDG

The framing nail is used for wood to wood constructions. The clipped head and the tight collation means that more nails can be loaded in the tools, the wire weld collation is not affected by wetness, storage time or temperature. The grooved shank increases the shear capacity.

Features

Material

*

Advantages

- Clipped head (D-head)
- Grooved shank
- Hot dip galvanised
- Wire weld collation 34°

Applications

Support

- Framing wood to wood

Intend Use
