SIMPSON
Strong-Tie

BAN09 Windbracing Strap

BAN09 windbracing straps can be used for anchoring and bracing of roof constructions. The engineered "strong-holes" ensures a very light 0.9 mm strap with the same capacities as a 2mm strap. The thin material makes the strap easy to lift and handle on the job site. And it is easy to cut with metal shears.

Features

Material

Steel:
S550GD + Z275 according to EN10346

Corrosion protection:
275 g/m² on both sides - correspond to a zinc layer of approx. 20 µm

Advantages

- Reinforced holes offer enhanced strap tensile capacity
- Very light weight but strong
- Easy to cut with metal shears
