

## GSGEARBOX GSGEARBOX

The GSGearbox 1:20 is a powered handheld tool for the installation of GSF and GSA screw foundations at a maximum depth of 1,000 mm. For larger projects or when installing screw foundations in particularly hard or challenging soil, it can be advantageous to use the Gearbox 1:20. Suitable for the installation of screw foundations for terraces, greenhouses, sheds, cabins, and similar projects, as well as for locations with difficult access or sensitive terrain. With Gearbox 1:20, you can handle the installation quickly and easily. The use has been tested by experts at Bayo.S.

## Användning

### Benefits

- Kompatibel med alla GSF- och GSA-markskravar
- Vridmoment upp till 50 Nm
- Skruvdjup: 1000 mm
- Vikt: 25 kg inkl. teleskopstång

### Satsen innehåller:
